

Andrii Shupta

Lead / Principal Full Stack Developer

TypeScript | React | Next.js | Node.js | NestJS | AWS | GCP | Supabase | PostgreSQL | Microservices

andriishupta.dev

PROFILE

Lead / Principal Full Stack Developer with 10 years of experience building web applications, APIs, microservices, analytics platforms, payment systems, CMS products, and cloud-native systems. Strong fit for roles requiring TypeScript, React/Next.js, Node.js/NestJS, PostgreSQL, AWS/GCP, system design, technical leadership, legacy modernization, CI/CD, and cross-functional delivery.

Proven record leading teams/sub-teams, creating architecture from scratch, improving pipelines, mentoring engineers, interviewing candidates, and shipping production systems across enterprise and startup-style environments.

CORE STRENGTHS

- Full-stack product engineering: React, Next.js, Angular, Node.js, NestJS, Express, Hono, REST, GraphQL.
- Architecture and modernization: microservices, micro-frontends, monolith decomposition, legacy PHP/Angular migration, SDK/UI library development.
- Cloud and data systems: AWS Lambda, API Gateway, Step Functions, S3, SQS, SNS; GCP BigQuery; Supabase Auth/Database/Storage; PostgreSQL, MySQL, MongoDB, Redis, Kafka.
- Leadership: feature planning, implementation plans, code review, QA ownership, delegation, delivery process improvements, interviews, mentoring, and team/sub-team leadership.
- AI-assisted engineering: practical use of OpenAI API and modern AI coding tools for faster delivery, content workflows, code review support, and product development.

TECHNICAL SKILLS

Frontend	React, Next.js, Angular, Redux, Context API, Apollo, React Query, Tailwind, Chakra UI, Material UI, Ant Design
Backend	Node.js, NestJS, Express.js, Fastify, Hono.js, REST APIs, GraphQL, microservices, monoliths
Cloud / DevOps	AWS Serverless Framework, Lambda, API Gateway, Step Functions, S3, SQS, SNS; GCP BigQuery; Azure, Vercel, Cloudflare; CI/CD
Databases / Events	PostgreSQL, MySQL, MongoDB, Redis, Kafka, Drizzle, Prisma, SQL procedures, text search, caching
Other	Python, Gleam, PHP, Java, Dart, Kotlin; Scrum, Extreme Programming, payment systems, web application architecture

SELECTED EXPERIENCE

GlobalLogic - Lead / Principal Full Stack Developer | Feb 2023 - Feb 2026 | Full-time

- Principal Full Stack Developer on a sport-related management and analytics platform; led development of new functionality and worked with high-volume data processing using Google BigQuery and third-party APIs.
- Developed company-wide SDK and UI libraries to standardize delivery across teams and products.
- Led new feature development for a ticketing platform using React micro-frontends and created a new microservice architecture to replace a legacy system while partially supporting PHP legacy code.
- Built a custom CMS from scratch for a retail client: architecture, tickets, feature planning, QA, CI/CD, OpenAI API integration, third-party retail APIs, custom SQL procedures, and text-search API work.
- Consulted a Web3 platform on Supabase Auth, RLS, performance, Next.js 14 best practices, code review, and implementation improvements.

Stacks: React, Next.js 13/14 App Router, Node.js/Fastify, GCP BigQuery, PostgreSQL, MySQL, Drizzle, Prisma, Redis, Kafka, Supabase, OpenAI API, PHP.

Intellias - Lead / Key Full Stack Developer | Feb 2021 - Feb 2023 | Full-time

- Worked on a high-load digital assets platform, focused on the core API layer for fetching and maintaining account information.
- Used Redis caching to achieve near-zero response time for clients retrieving actual account information.
- For an entertainment project, helped build a new payment approach with funding sources, modernized legacy invoicing and billing, introduced AWS Step Functions, integrated Stripe API/webhooks, and moved services toward TypeScript.
- Supported changes across 10+ services, including database migrations, Kafka/Aiven usage, L3 tracking, and legacy modernization.
- Led front-end teams/sub-teams, contributed across full-stack projects, conducted ~20 interviews, and supported Agile/Scrum transition from both company and client sides.

Stack: React, Node.js, NestJS, AWS, MongoDB Atlas, Redis, Kafka/Aiven, Stripe API, TypeScript.

EPAM Systems - Senior Full Stack Developer / Key-Lead Developer | Jun 2019 - Feb 2021 | Full-time

- Led front-end teams/sub-teams and played key roles in front-end and full-stack delivery.
- Moved a large Angular application to an Nx monorepo, reducing build time from 30 minutes to 15 minutes.
- Replaced Jasmine with Jest, reducing test and pipeline execution time for 500 tests to under 10 minutes.
- Introduced a Contract API approach to reduce FE/BE delivery conflicts and improve integration quality.
- Created implementation plans for stories/tasks so less experienced developers could follow stronger approaches and delivery standards.
- Primary interviewer for projects with 15+ internal interviews; lecturer at 2 EPAM events and EPAM Front-End Lab; participated in mentoring program.

Stack: React, Node.js, AWS, Angular, PostgreSQL, Nx, Jest.

Earlier experience | 2016 - 2019

- Ciklum - Middle+ Front-End Developer: 3 Angular SPAs, 1 legacy Riot.js SPA, integration tests with Karma, e2e architecture with Protractor/Cucumber.js, Kotlin e2e tests, CI/CD improvements, multi-environment delivery.
- Mobilunity - Middle Full Stack Developer: architecture and development for separate and shared-code Angular SPAs, Node.js/Express/Adonis.js API, Chrome extension MVP with Vue.js later rewritten with Angular.
- Finance Magnates - Middle Full Stack Developer: internal SPA with React, Node.js/Express, Git, Jira.
- Keepit - Junior Front-End Developer: backup-oriented product; worked on SPA versions with Vanilla/jQuery and AngularJS 1.5.

EDUCATION

- National University "Lviv Polytechnic" - Master of Computer Science, 2017.
- National University "Lviv Polytechnic" - Bachelor of Computer Science, 2016.

BEST-FIT ROLES

Lead Full Stack Developer | Principal Full Stack Developer | Senior Full Stack Engineer | Staff Full Stack Engineer | Full Stack Architect | React / Node.js Lead | Next.js / Supabase / AWS Full Stack Engineer
